Collard Wolves in area?	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No	If Yes, then number:
Blood on Vegetation?	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No	Describe:
Apparent point of first feeding:	N/A		
Percentage of Carcass Remaining			
<input checked="" type="checkbox"/>	0-25%---No soft tissue, hide present, disarticulated.		
<input type="checkbox"/>	26-50%--All organs consumed, all or most of quarters consumed, partial disarticulation.		
<input type="checkbox"/>	51-75%--All organs and portions of the hind quarters consumed, front quarters and neck intact, articulated.		
<input type="checkbox"/>	76-100%--some organs consumed, most soft tissue intact, skeleton articulated.		
Describe any additional evidence that is discovered in the area:			
N/A			

## DEPREDATION REPORT FORM

Describe hemorrhages and corresponding marks seen while skinning the hide or other abnormalities (Location and type, e.g. claw marks on right hind leg, or canine marks on neck):			
Canine marks with corresponding hemorrhage were located on the right front leg and the left back leg.			
Canine spread (if applicable): mm		37.0mm, 40.9mm, and 2-39.5mm.	
Cause of Damage:			
<input checked="" type="checkbox"/>	Confirmed	Carnivore (list Species):	Mexican Gray Wolf
	Probable		
	Possible		
	Accident		
	Unknown		
	Other:		

<b>ADDITIONAL INFORMATION:</b>									
Were photos taken of the site?	<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No	Attached?	<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No
Was a veterinarian involved in cause of death determination?		Yes	<input checked="" type="checkbox"/>	No		Yes	<input checked="" type="checkbox"/>	No	
If yes, is a veterinarian report attached?		Yes	<input checked="" type="checkbox"/>	No		Yes	<input checked="" type="checkbox"/>	No	

**SUMMARY OF INCIDENT** (including preface and actions taken):

On May 27, 2020, I was made aware of a second depredation while responding to a depredation investigation. The second carcass was located approximately 20 yards to the south of the first. While investigating the scene no wolf tracks were found around the carcass or in the surrounding area. It was reported that a wolf was seen in the area the previous day. I only located coyote tracks and scat at the scene.

When the necropsy was performed canine marks with corresponding hemorrhage were found and documented on the right front leg and the left back leg of the calf. The evidence that was documented is consistent with Mexican Gray Wolf predation and the incident was confirmed.

**Photo Log:**

1. Carcass as it was found.
2. Canine mark on the left back leg with corresponding hemorrhage measuring 37.0mm.
3. Canine marks on the right front leg with corresponding hemorrhage measuring 39.5mm.
4. Canine marks on the right front leg with corresponding hemorrhage measuring 39.5mm.
